ALEKSANDAR CONIC

FRONTEND DEVELOPER

PROFESSIONAL PROFILE

I am an experienced FullStack Developer with a solid background in React JS, Node JS, and website design, backed by two years of professional experience and four years of professional practice. I possess a strong drive to create innovative and adaptable solutions, while maintaining a meticulous attention to detail. Additionally, I am adept at collaborating effectively within a team environment.

WORK EXPERIENCE

Frontend Developer

HandsOn Systems

March 2022 - June 2023

- Creating and designing web pages using React.JS & CSS
- I have experience working with location-based data in real-time, such as RFID technology used for asset tracking.
- As a React Developer, I am responsible for handling API calls between the frontend and backend of the application.
- As a software developer, I have experience working with large MySQL databases to build high-performance applications that can handle large volumes of data

Beginner FULLSTACK developer

VegaIT

September 2021 - November 2021

- I have delve into the world of NodeJS, MySQL, MongoDB, and authentication as part of my journey to become a backend developer,
- Improving knowledge of React JS & React Native language
- Working with Application Programming Interface (API)
- Developing mobile applications (Android/iOS)

EDUCATION

ETŠ "Nikola Tesla"

Mechatronics technician

2014 - 2018
